

## EMIRATES LAKE

Dubai, U.A.E.

### Area Type

Low rise residential

### Size:

60 h.a. Fresh water and sub soil water lakes

### Project Highlights

- Water distribution network
- Storm drainage network
- Sewage network
- Lakes recharge design

### Lead Engineer / Client

Italconsult (for infrastructure)  
Emaar Properties

The master plan involving infrastructure involving the wet services as well as the Lakes recharge design was carried out by Mario Associates and supervised by Italconsult for execution.

The project has almost 6 kms of community roads and 4 small lakes (two for fresh water storage for irrigation) and 1 large central decorative lake with recharging from sub-soil water, designed by Mario Associates.
